

Introducing **ALOEPOWER** Glove Series!

The glove that you love without the dry skin...
Available in BOTH NITRILE and LATEX!

We'd like to introduce you to the newest and most innovative hand protection on the market today!

AloePower...the next generation of hand protection.

Available in two materials, NITRILE and LATEX, the AloePower Glove Series can provide superior protection based on your specific working environment.

Whether you choose chemically resistant nitrile or extra thick latex, you can rest assured that your choice is not only protecting your hands from hazards, but soothing them while you work with our patented freeze dried aloe inner layer.

Take a look at our two new AloePower options!

5.5 mil Thick Nitrile
Powder Free
Latex Free
Chemically Resistant

7.0 mil Thick Latex
Powder Free
Extra Thick
Extra Tough!

Both AloePower Glove Types Provide:

Superior Comfort for extended wear.

Freeze dried aloe coating to moisturize damaged, cracked, and chapped hands.

Textured Finish for unsurpassed grip in both wet and dry conditions.

*"Aloe is a natural moisturizer that hydrates and soothes your skin.
AloePower Gloves contain a patented freeze-dried aloe inner layer
which is rehydrated when you put the gloves on,
soothing and calming while you work."*
